

Precoat Metals

Precoat Metals

Wide Load

Our Kingsbury, Indiana plant is the widest and heaviest coil coating line available in the country, spanning 72 inches and coating steel up to

0.112 inches thick. Additionally, this coating line can tension level your material for those applications where

flatness is critical. Conveniently located near multiple metal sourcing options, this facility can handle rail and truck and is capable of servicing a wide range of markets from automotive to construction products.

We continue to focus on excellent customer service so you can meet your tight deadlines and enjoy the highest quality in coatings.
